

Danes Class Homework Projects – Spring Term 2022

In order to support and enrich our learning in class, each child should choose one of the activities below linked to our work in science (Evolution and Inheritance) or Geography (Extreme Earth). Once completed this should be brought into school where it will be shared with the class. Children may prefer to use ideas of their own, or even wish to complete more than one of the activities below – we are very happy for the children to be as creative as they wish! Please make sure that work is completed and brought into school by Wednesday 9th February at the latest.

Make a model volcano. Can you make it erupt?

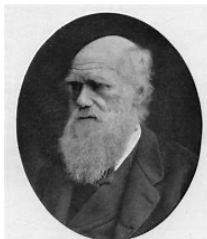

Find out about a natural disaster – perhaps a volcanic eruption, an earthquake or a tsunami. Write a report about what happened. You could present this as a newspaper report.

Use your artistic skills to create a picture of a volcano – you could draw or paint, or even make a collage.

Find out about Charles Darwin and why he is famous. You could prepare a Powerpoint presentation or make a poster about him.

Use clay, or any other material, to make some models of fossils. Or, if you prefer, produce a piece of fossil inspired art.

Find out as much as you can about fossils. You could produce a fact sheet, prepare a presentation, construct a timeline or even make a set of Top Trumps.
