

## Year 2 Science Home Learning

Here are a few suggestions for science home learning to extend learning of current topic. It would be lovely to see any different ideas that you can think of to show your understanding of what we are learning in class.

Please bring them in for Wednesday afternoon to show and discuss with the class.

<p>Think it</p> <p>We have been thinking about human growth. Can you use photos/draw pictures to make a timeline of how you have changed and grown since you were born? How has your body changed? How have your skills developed? How will you continue to grow and develop as you get older?</p>	<p>Make it</p> <p>Make your own pairs game for animals and their babies. You could ask an adult to help you find pictures online to use for your pair of cards, or draw your own.</p>
<p>Write it</p> <p>What is your favourite animal? Draw a picture of it as a baby and then again as an adult. Can you write a short description of how it has grown into an adult?</p>	<p>Cook it</p> <p>We will be looking at healthy eating and what is meant by a healthy diet. Try making a healthy meal at home? Can you sort the ingredients into the different types of food and explain why it is healthy?</p>
