

YEAR 2 SCIENCE HOME LEARNING - AUTUMN TERM 1

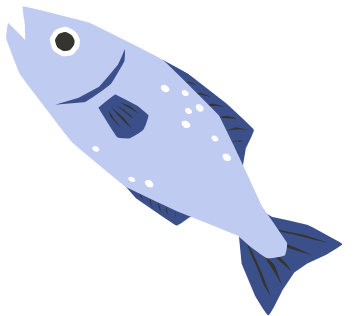

ANIMALS INCLUDING HUMANS

To extend your learning on our current topic, Animals including Humans, please choose a suggestion from the grid below and bring your work into school on a Wednesday for our Science class. If you have another idea to show your deeper understanding, please feel use your creativity in the way you choose.

Choose an animal from one of the following groups - mammal, amphibian, fish, bird or reptile. Design a new animal that would fit into your chosen group. Design your animal and explain the choices you have made.

Make your own 'eat well' plate with food at home and take a picture. Can you add labels to show the food groups and say why it is balanced?

With an adult, research an animal of your choosing. Draw your animal as a baby and then as an adult using paper or technology. Can you explain the differences or similarities?

Create an excersize diary for one week of your life to show how much excersize you do. Remember to include activities at school and at home. You could present this in any way you choose - short video diary, paper diary, typed diary, pictures, etc.
