

Year 2 Science Home Learning

Summer Term 1 - Plants

To extend your learning on our current topic, Plants, please choose a suggestion from the grid below and bring your work into school, or upload to Seesaw . If you have another idea to show your deeper understanding, please feel free to use your creativity in the way you choose. All home learning must be brought in by the **4th July 2024**.

Design it

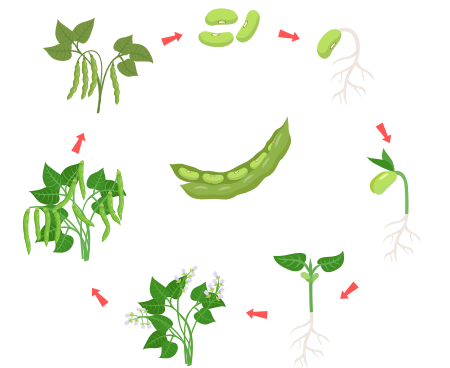

Design a seed packet with instructions on how to keep the plant healthy once it is planted. You could include illustrations. You could even make a real packet with homemade paper seeds inside!

Write it

Research a flower or plant lifecycle.

Write about what you have learnt and include as much detail as you can about the flower or plant you have chosen. Add your own diagrams alongside your writing.

Make it

Work with an adult to find out what plants you could plant in your garden or in pots for your home. Follow the same steps we used in class and take a picture of your new plants as they grow.

Research it

Draw or photograph the flowers in your garden. Research what they are and label your photos or drawings with the parts of the flowers.
