

Year 2 Science Home Learning Summer - Plants

To extend your learning on our current topic, Plants, please choose a suggestion from the grid below and bring your work into school on a Tuesday, or upload to Seesaw. If you have another idea to show your deeper understanding, please feel free to use your creativity in the way you choose.

All home learning must be brought in before **7th July 2026**.

Design it

Design a seed packet with instructions on how to keep your plant healthy once it is planted. You could include illustrations and you could even make a real packet with homemade paper seeds inside!

Research it

Research a flower or plant lifecycle. Write about what you have learnt and include as much detail as you can about the flower or plant you have chosen. Add your own diagrams alongside your writing.

Grow it

Work with an adult to find out what plants you could plant in your garden or in pots for your home. Follow the same steps we used in class and take a picture of your new plants as they grow.

Create it

Draw, paint or photograph the flowers in your garden or near your home. Research what they are and label your photos or art with the parts of the flowers.
